

PRESS RELEASE

Steward Consulting Named 2011 Technology Pacesetter by Accounting Today

TULSA, OK - Nov. 10, 2011 - Steward Consulting, Inc. (SCI) was named a 2011 Technology Pacesetter by Accounting Today magazine for the second year in a row. Every year, Accounting Today publishes its Technology Pacesetters list honoring top-flight resellers in the accounting and ERP software marketplace. Members of the list are firms that carry this software as a central part of their product line and that have demonstrated excellence in the field.

Because excellence and innovation are not restricted to large firms, they do not consider revenue or firm size in selecting the Pacesetters; instead, their editors' choices are based on factors such as industry awards received (such as our Sage President's Circle awards, Sage certifications, etc.), growth, innovation, customer service, participation in building the profession, and a firm's general reputation.

This is an extreme honor for SCI not only to be considered for but to be named a Technology Pacesetter and we greatly appreciate the confidence in us from the editors and our clients.
